SUMMARY

- Front-end developer skilled in crafting **user-centric, responsive, and efficient web applications** that deliver seamless user experiences.
- Graduated from the **3MTT Software Development Program**, where I was recognized for impactful projects like **TrackDem** and emerged as a **Top 5 finalist** at the Rivers State Hackathon.
- Advanced through the **ALX ProDev Front-End Development Program**, gaining exposure to **industry standards, team collaboration**, and **deployment best practices** using **Next.js, Tailwind CSS**, and modern workflows.
- Participated in a **hackathon project (StuffSwap)** — a swap-based listing web app that strengthened my hands-on experience with **HTML, CSS, JavaScript**, and problem-solving in fast-paced environments.
- Combines technical proficiency with strong professional soft skills to solve complex website challenges effectively.

ALX Professional Foundations	December 2024
ALX Pro Dev Front End	October 2025

WORK EXPERIENCE

Frontend Developer (Volunteer/Contract) - Artza <ul style="list-style-type: none">• Initiated the development of Artza's official website from scratch, contributing to the startup's online presence and branding.• Built a modern, responsive user interface using Next.js, Tailwind CSS, and TypeScript, ensuring optimal performance and accessibility across devices.• Maintained clean, scalable code architecture while implementing reusable components for faster future development.• Partnered with the founding team to translate brand ideas into functional web experiences, improving engagement and credibility during the startup's early phase.• Achieved a fully functional, SEO-friendly frontend foundation ready for backend integration and product scaling.	October 2025
Capstone Project – Task Manager <ul style="list-style-type: none">• Designed and developed an intuitive task management system with features such as task categorization and priority levels.• Utilized HTML, CSS, and JavaScript with responsive design principles to ensure full functionality across devices.	November 2024

- Delivered a clean, **user-friendly interface** that improved task tracking efficiency and usability.

TrackDem – Attendance Management Software

November 2024

- Built** an ID-based attendance system that ranked among the **Top 5** at the **3MTT Rivers State Hackathon**.
- Developed** front-end interfaces emphasizing real-time data logging and seamless user interaction.
- Collaborated** within a hackathon environment to achieve a responsive and intuitive solution under tight deadlines.
- Showcased strong UI development and problem-solving skills through a competitive, results-driven project.

StuffSwap – Hackathon Project

July 2025

Front-End Developer

- Co-developed** a swap-based listing platform enabling users to **exchange items, message other users**, and **track swaps**.
- Implemented** responsive layouts and real-time interactivity using **HTML, CSS**, and **JavaScript**.
- Enhanced** teamwork, creativity, and rapid prototyping skills under **time-constrained hackathon conditions**.
- Delivered a functional, user-centered platform that demonstrated collaborative design thinking and full **front-end implementation** capability.
